PRODUCT ENGINEERING

PUBLISHED MONTHLY

McGRAW-HILL PUBLISHING COMPANY, INC. 330 West 42d Street, New York, N. Y.

INDEX TO VOLUME 8

January to December 1937

January 1– 40
February 41– 80
March 81–120
April 121–160
May 161–200
June 201–244
July 245–288
August 289–332
September 333–376
October 377–420
November 421–476
December 477–520

A

Acceleration time figured. M. N. Halberg *148

Aeronautics:

Barkley-Grow plane *464
Wright engine improvements in ten years *290
Air cleaner or electrostatic precipitator. *472
Air compressors redesigned to fit different engines *350

Aluminum:

Aluminum coated steels now available 411

American Foundrymen's Association.:

Annual convention 235

American Society for Testing Materials:

New York meeting..... 321

American Society of Mechanical Engineers:

Program of Detroit meeting..... 192
Ammeter, built-in, mounted on grinder.. *205

Appearances and Finishes:

Color plating electrclytically..... *317
Color selection for appeal plus serviceability. Raymond Loewy..... *231
Colors in porcelain enamel..... *507
Decorative effects with organic finishes. M. H. Corbin..... *407
Decorative treatments for molded plastics. Brill & Federico..... *23
Device to test thickness of paint films 366
Every finishing specification is a special problem. Gustave Klinkenstein *82
Finish-engineering department. J. E. Hyler 273
Oil burner finish. Gustave Klinkenstein 405
Selecting colors for product finishes. Gustave Klinkenstein 129
Trailer displays lacquer and finishes. *152
Warner & Swasey's finishing methods. W. J. Burger..... *254

Automobiles:

Automotive differential gear mechanisms. Herbert Chase, pt. 1, *324; pt. 2, *402; pt. 3..... *502
Buick uses fifty die-castings..... *85
General Motors discusses the philosophy of customer search..... *162
1938 models *478
Steel tubing in the automotive field.. *357
Studebaker engineering *378

Awards:

A.S.M.E. honors prominent engineers 32
Franklin Institute awards medals to four designing engineers..... 236

B

Bar heater with photoelectric trip..... *339
Beams, formulas for deflections and bending moments. R. J. Roark, *54; pt. 2 ..... *118
Beams under simultaneous, transverse and axial loading. R. J. Roark (Ref. Bk. Sheets)..... 519

Bearings:

Applications of bearings in 1937 automobiles *27
Ball bearings used as cam rollers. Thomas Barish *2
Developments in bearings and bearing materials. A. B. Willi..... *13
Methods of sealing sleeve bearings. R. G. N. Evans..... *110
Needle-bearing formula. Lee Walther *316
Replacement of babbitt-lined bearings. A. B. Willi..... *66
Self-lubricating bearing. Steel, Chilcott *29
What type of bearing is most suitable? H. D. Seymour..... *67

Belts:

Comparative serial numbers of Standard V-belts (Ref. Bk. Sheets)..... 39
Resistance of belt to slipping shown by chart. S. F. Cavalli..... *228
Blueprinting machine *432
Boat, combination automobile, tractor and boat *8
Bolts and nuts, galvanized, diameter tolerances for 321
Book reviews.....38, 78, 117, 158, 198, 242, 286, 330, 372, 418, 518
Brake, solenoid, on hoist..... *456
Broaching machine with spiral drive.... *339
Bucket, clam-shell *339
Bucket, coal *46

C

Camera adjusts exposure by photo-electric cell *88
Camera, candid *470
Camera, movie *390
Camera tripod *490
Case hardening. see Nitriding.
Cash register *428

Castings:

Designing sand castings for best foundry results *216
Die-cast lock *168
Die castings used in Buicks..... *85
Malleable iron castings. Enrique Touceda *393
Micrometer tuning mechanism die cast *16
Quality iron castings in modern mechanical designs. P. E. McKinney. *177
Chloroprene rubber *494
Cement mixer redesigned..... *338
Ceramics, Kemite for table tops..... 323
Chucking machine, New Britain, has hydro-electric controls *246
Circular segments chart. L. D. Hagenbook *107

Color:

Color matching disk for automotive use *490
Color plating electrolytically..... *317
Every finishing specification is a special problem. Gustave Klinkenstein *82
Porcelain enamel colors..... *507
Selecting colors for product finishes. Gustave Klinkenstein 129
Selection of color for appeal plus serviceability. Raymond Loewy... *231
Compensator, wheel-wear, in grinder.... *386
Compressor with force-feed lubrication system *250
Concentricity and eccentricity. R. G. N. Evans *363
Concrete mixer *297

Controls:

Air-oil-electric controls for molding machine *252
Chucking machine has hydro-electric controls *246
Electric automatic stop mechanisms. *222
Fan-controlled tension *296
Formatrol controls dry cleaning machine *434
Methods of electric control. R. S. Elberty, Jr., pt. 2..... *30
Motor protection relays. C. G. Armstrong *267
Pneumatic control circuits..... *276
Spot welding machine has hydraulic control *440
Windmill generator speed limited.... *426

Conveyors:

Belt with solid surface..... *205
Multiple conveyor chain on truck.... *7
Split tubular rubber conveyor..... *45
Crusher driven by roller chain..... *488

D

Design, Calculations and Examples:

Air compressors redesigned to fit different engines *350
Aircraft engine *262
Baldwin streamlined locomotive for the New Haven..... *138
Chucking machine has hydro-electric controls *246
Compensator, wheel-wear, in grinder. *386
Design for welding. E. J. Charlton *258; pt. 2..... *310

* Illustrated

L605.1
P943

624977

Developments in bearings and bearing materials. A. B. Willi.....*13
Die casting machine.....*384
Dynagraph *166
Electronic tube applications. E. H. Bernhardt *24
Factors of safety are poor substitutes for ignorance (ed).....289
Flexible metal hose for vibration and temperature applications. D. W. Fentress *491
Force feed lubrication system in compressor *250
General Motors discusses the philosophy of customer research.....*162
Grinder having interlocked gear drive for adjustable speed.....*294
Grinder having recessed base, automatic oil feed, built-in control.....*337
Heavy machinery designed with rubber mountings. S. H. Hahn, pt. 1, *59; pt. 2.....*96
Hoppers for feeding work automatically. W. E. Summerhill.....*70
I.B.M.'s technical research division..307
Molding machine with air-oil-electric controls *252
Motor-driven machinery design features *174
Non-circular gear design. J. J. Pesqueira, pt. 2, *19; pt. 3, *63; pt. 4 .....*102
Oil burners and cement mixer redesigned *338
Orsatomat, a flue gas analyzer.....*167
Patent protection for product appearance. C. C. Batz.....*172
Photography in engineering work. Robert Avard *348
Railway coach, Egyptian Zipper.....*270
Rolls, straightening, machine.....*387
Safety in machinery design. F. A. Mickle 274
Sand castings designed for best foundry results *216
Santa Fe's stainless steel train.....*271
Standards for spring design. W. M. Griffith, pt. 1, *89; pt. 2, *140; pt. 3 .....*184
Studebaker engineering *378
Substitution of materials not always invention. H. A. Toulmin, Jr.....*342
Telescope of 22 ft. diameter in construction at Westinghouse Electric.*212
Thermometer redesigned to harmonize with dairy equipment. E. H. Hammond *100
Tractor redesigned to eliminate projections *7
Trends in engineering design (charts) 422
Trends in engineering design in heavy machinery 443
Trends in engineering design in heavy portable machinery 453
Trends in engineering design in instruments 467
Trends in engineering design in medium size machinery.....432
Trends in engineering design in non-mechanical products 471
Trends in engineering design in small machinery 424
Trends in engineering design summarized 476
Trends in engineering design in transportation equipment 462
Turbine steam, built by Westinghouse*308
Vibrations eliminated in roll-grinding machinery. Herbert Chase.....*299
What is not invention. H. A. Toulmin, Jr. 497
Wright engine improvements in ten years *290
Die casting machine, Reed-Prentice.....*384

Drawings:

Card form system for indexing drawings. J. J. Calhoun.....*202
Drawing sheet sizes and folding practice. J. W. Emmons.....190
Indexing drawings to avoid duplication. G. F. Shawk.....*18
Opportunities in drafting. E. S. Cricker 188
Drill, electric *491
Drilling machine with flexible shafts.....*430

Drives:

Broaching machine with spiral drive.*339
Facing with hydraulic and mechanical drives. M. Kronenberg.....*66
Interlocked gear drive for adjustable speed grinders *294
Roll grinder headstock has V-belt drive *9
Turntable has intermittent motion. A. C. Woodbury *26
Dry cleaning machine controlled by formatrol *434
Dynagraph *166

E

Editorials:

Brain supply 121
Development bears fruit.....41
Engineering for tomorrow.....161
Engineering recognition 1
Engineers to the rescue.....421
Factors of safety are poor substitutes for ignorance 289
For better professional recognition...377
Production's demands on design.....81
Revised designs 477
Science is never defeated.....201
Shall inventions be regulated?.....333
Social problems and the engineer.....245
Electric comforter with control unit.....*469
Electrostatic precipitator or air cleaner..*472

Engineering:

Engineering recognition (ed).....1
Studebaker engineering *378
Trends in engineering design (charts) 422

Engines:

Allis-Chalmers oil engines.....*446
Allison aircraft engine.....*262
Wright airplane engine improvements in ten years.....*290
Excavator, 1 yd P & H Pacemaker.....*52
Extruded zinc parts. Herbert Chase....*214

F

Fan-controlled tension *296
Fan within a fan for double-duty delivery.*431
Feeder with dual magnets.....*206
Feeder with electro-magnet as motor.....*206
Feeding work automatically with hoppers. W. E. Summerhill.....*70
Filing drawings with the card system. J. J. Calhoun.....*202
Filing magazine clippings. A. W. Eldman 404
Finishing machine, cam and crank bearing *486
Forging, drop, design.....*108
Formulas for torsional deformation and stress. R. J. Roark.....*134
Freezer for ice cream.....*438
Friction reduction. J. E. Hyler.....316
Furnace, electric, hollow-electrode type..*112
Fuse head of plastic.....*295

G

Gears:

Automotive differential gear mechanisms. Herbert Chase, pt. 1, *324; pt. 2 .....*402
Design for non-circular gears. J. J. Pesqueira, pt. 2, *19; pt. 3, *63; pt. 4 .....*102
Gear-bore proportions. P. H. Black..*227
Gear-bore proportions. Bland, Nachod *362
Gear-checking machines with sine bars *297
Gear-hardening machine with four torches *205
Wear load values for spur and bevel gears. J. G. Urbank..... 227

Glass:

Fibrous, finds new applications..... 113
Fibrous glass. L. W. W. Morrow....*499
Glass made from synthetic resin..... 87
Glass piping 253
Governor, hydraulic, for turbine valve...*128
Grader, caterpillar *460

Grinders:

Coffee grinding mill has automatic flash to show size of grind.....*425
Coffee mill of compact design.....*428
Grinder having interlock gear drives for adjustable speed.....*294
Grinder having recessed base, automatic oil feed built-in controls.....*337
Grinder, roll, designed to eliminate vibration. Herbert Chase.....*299
Grinder with wheel wear compensator.*386
Safety floor grinder.....*441
Spring toggle grinding feed.....*340
Sundstrand tool grinder.....*442

H

Handles for refrigerators of plastic with zinc core *8
Heater, bus *475
Helicoid, axial curvature of the involute. J. G. Urbank.....*68
Hinge is water and dust-proof.....*47
Hoist, dual braking system.....*456
Hoisting cage *484
Honing machine, Barnes Drill.....*452
Hoppers for feedng work automatically. W. E. Summerhill.....*70
Hose, convoluted flexible metal. Husted & Ingalls *144
Hose of flexible metal for vibration and temperature applications. D. W. Fentress *491
Hose of synthetic rubber.....*296
Hydraulic pressure drop in long tubes. Hans Ernst 147

* Illustrated

I

Indexing drawings to avoid duplication. G. E. Shawk.....*18
Indexing machine, Greenlee.....*451
Insulated conductors for electrical apparatus. J. R. Becker.....*10
International Business Machines coordinates design 307
Inventions, regulation, opposed.....365
Inventions, shall we regulate? (ed).....333

J

Jack, hydraulic, controls scraper.....*458
Jack of heat-treated steel.....*430

K

"K" monel properties.....*264
Kiln nose ring.....*46

L

Lacquer, emulsified. L. J. Smith..... 314
Lamp reflector for 1,000 watt lamp.....*208
Lamp suspension gives angular adjustment. F. Loewenberg.....*68
Lighting unit for buses and railroad cars.*470
Lights, emergency luminaire designed to operate on storage battery.....*485
Lincoln Welding Foundation established.. 72
Linkage problems. W. H. Rasche.....*505
Loads on tillage tools measured by hydraulic device *237
Lock, die cast.....*168
Locks, retainer and location snap locks. Adam Fredericks *189

Locomotives:

Progress in locomotive design (A.S.M.E. meeting) 321
Streamlined, for the New Haven.....*138
World's largest diesel locomotive engine *463
Lubrication, force feed lubrication system in compressor *250

M

Machinery:

Trends in engineering design in heavy machinery 443
Trends in engineering design in heavy portable machinery 453
Trends in engineering design in medium size machinery.....432
Trends in engineering design in small machinery 424
Trends in engineering design summarized 476
Magnetic filter. Frantz, Harman..... 406
Magneto, permanent-magnet *468
Magnets, permanent. J. Delmonte, pt. 1, *122; pt. 2, *181; pt. 3.....*220

Materials:

Choosing the material and construction methods. R. E. Collier..... *42
Cu-Al-Ni alloy design data.....*264
Developments in bearings and bearing materials. A. B. Willi..... *13
Fibrous glass. L. W. W. Morrow....*499
Malleable iron castings. Enrique Touceda *393
Nitriding machine parts.....*391
Permanent magnets. J. Delmonte, pt. 1, *122; pt. 2, *181; pt. 3.....*220
Preparation of materials for resistance welding. J. M. Cooper.....*360
Temperature, resistivity curves of electrical resistors. L. G. Hall (Ref. Bk. Sheets) pt. 1, *159; pt. 2.....*199
McGraw, James H., Jr., elected president of McGraw-Hill Publishing Co.....*279

Mechanisms and Constructions:

Automotive differential gear mechanisms. Herbert Chase, pt. 1, *324; pt. 2, *402; pt. 3.....*502
Ball bearings used as cam rollers. Thomas Barish *2
Beams, formulas for deflections and bending moments. R. J. Roark, *54; pt. 2.....*118
Beams under simultaneous, transverse and axial loading. R. J. Roark (Ref. Bk. Sheets)..... 519
Choosing the material and construction method. R. E. Collier..... *42
Cylindrical and conical spring design charts. V. Tatarinoff..... 344
Electric automatic stop mechanisms.*222
Formulas for circular rings. R. J. Roark (Ref. Bk. Sheets) *287; pt. 2, *331; pt. 3.....*373
Formulas for combined stress. R. J. Roark (Ref. Bk. Sheets).....*419
Formulas for torsional stress and deflection. R. J. Roark.....*134

Geometric progressions of speeds. Rantsch, Decker, Shaw.....*228
Mechanical automatic stop mechanisms *186
Methods of electric control. R. S. Elberty, Jr., pt. 2..... *30
Micrometer tuning mechanism..... *16
Non-circular gear design. J. J. Pesqueira, pt. 2..... *19
Pneumatic control circuits.....*276
Predicting heat rise on motors. Puchstein & Lloyd.....*305
Shafts subject to torsion. C. P. Nachod *313
Starting torque of split phase motors. Puchstein & Lloyd (Ref. Bk. Sheet) pt. 1 .....*243
Torque motors and their applications. F. W. Jessop.....*131
Working stresses for compound loaded members. Joseph Marin.....*169
Working stresses for members affected by creep. Joseph Marin.....*209
Mellon Institute building to be dedicated.*193
Messenger bag *6

Metals:

Cu-Al-Ni alloy design data.....*264
Designing sand castings.....*216
Malleable iron castings. Enrique Touceda *393
Symposium on wear of metals..... 236
Temperature, resistivity curves of electrical resistors. L. G. Hall (Ref. Bk. Sheets) pt. 1, *159; pt. 2.....*199
Working stresses for members affected by creep. Joseph Marin.....*209
Meter, gas, has anti-tampering device...*489
Metering sight-feed for lubricator..... *87
Micrometer tuning mechanism..... *16
Milling, drilling and boring machine..... *46
Mimeograph, old and new model.....*207
Mixer, food *428
Molding machine wth air-oil-electric controls *252
Motor cycle *431

Motors:

Braking A.C. motors by direct current. A. Finley.....*315
Design features desired in motor driven machines *174
Motor-generator with welded base...*208
Mounting reciprocating drive units. W. T. Shaler.....*404
Predicting heat rise on motors. Puchstein & Lloyd.....*305
Resiliently mounted motor is adjustable. F. A. Westbrook..... *69
Starting torque of split phase motors. Puchstein & Lloyd (Ref. Bk. Sheets) pt. 1.....*243
Torque motors and their applications. F. W. Jessop.....*131
Muffler for automobile.....*390

N

New materials and parts.....34, 74, 114, 154, 194, 238, 282, 326, 376, 414, 513
Nitriding machine parts.....*391
Nut, self locking.....*297

O

Oil burner finish. Gustave Klinkenstein.. 405
Oil burners redesigned.....*338
Ore skip *484
Orsatomat, a flue gas analyzer.....*167

P

Paints, decorative effects wth organic finishes. M. H. Corbin.....*407

Parts and Units:

Airplane, Barkley-Grow *464
Blue printing machine.....*433
Camera, candid *470
Cash register *428
Coffee grinder design shows size of grind *425
Coffee mill of compact design.....*428
Convoluted flexible metal hose. Husted & Ingalls.....*144
Designs and preparations for resistance-welded parts. J. M. Cooper..*334
Drilling machine with flexible shafts.*430
Dry cleaning machine controlled by formatrol *434
Electric comforter with control unit..*469
Electrostatic precipitator *472
Engine, Allis-Chalmers oil.....*446
Extruded zinc parts. Herbert Chase.*214
Fan within a fan for double duty delivery *431
Freezer for ice cream.....*438
Grader, caterpillar *460
Grinder, Safety floor.....*441
Grinder, Sundstrand tool.....*442
Heater, bus *475
Hoist, dual braking system.....*456
Honing machine, Barnes Drill.....452
Indexing machine, Greenlee.....*451
Insulated conductors for electrical apparatus. J. R. Becker..... *10
Jack of heat-treated steel.....*430
Lighting unit for buses and railroad cars *470
Locomotive, diesel engine.....*463
Magneto, permanent-magnet *468
Methods of sealing sleeve bearings. R. G. N. Evans.....*110
Mixer for food with planetary drive..*428
Motor cycle *431
Motor-protection relays. C. G. Armstrong *267
P & H excavator..... *52
Patentability or the difference between aggregation and combination. H. A. Toulmin, Jr.....*256
Permanent magnets. J. Delmonte, pt. 1, *122; pt. 2, *181; pt. 3.....*220
Preparation of materials for resistance welding. J. M. Cooper.....*360
Press, matrix molding.....*444
Press, plastic molding.....*445
Quality iron castings in modern mechanical designs. P. E. McKinney.*177
Range, electric *475
Range, kerosene *474
Retainer and location snap locks. Adam Fredericks *189
Roaster, electric *474
Rotary swaging. W. L. Bowen, Jr...*272
Sawing and filing machine.....*436
Scale has photoelectric cut-off.....*469
Scraper controlled by hydraulic unit.*458
Shovel, gas powered.....*454
Solenoid operated valves.....*150
Spot welding machine has hydraulic control *440
Spring tester *167
Steel tube joints.....*396
Steel tubing applications advanced by improved welding methods.....*302
Steel tubing in the automotive field..*357
Stoker *473
Straightening machine *442
Switch, thermoelectric *468
Telephone set, battery operated.....*470
Textile machine, Saco-Lowell.....*448
Thermostatic with plastic case.....*470
Tractor-trailer *461
Trolley bus, Twin-Coach.....*466
Tubing of seamless flexible metal. A. D. Blanchard..... *48
Vending machine for nuts.....*429
Viscosity units and methods of measurements. W. S. Owen.....*353
Western Union telegraph printer..... *94
Westinghouse refrigerator — finger pressure releases frozen trays.....*427
Windmill generator speed limited....*426

Patents:

Case histories in patent law. H. A. Toulmin, Jr. 281, 323, 413
Designer should know the difference between aggregation or combination. H. A. Toulmin, Jr.....*256
Patent protection for product appearance. C. C. Batz.....*172
Substitution of materials not always invention. H. A. Toulmin, Jr.....*342
What is not invention. H. A. Toulmin, Jr. 497

Photo-electric Cells:

Adjusts exposure in camera..... *88
Photoelectric trip for bar heater.....*339
What modern light relays can do. C. P. Bernhardt *224
Photography in engineering work. Robert Avard *348
Piping of glass..... 253

Plastics:

Decorative treatments for molded plastics. Brill & Federico..... *23
Refrigerator door handles made of tenite *8
Plating, Beryllium-copper chromium plated. L. G. Hall.....*228
Porcelain enamel colors.....*507
Press, matrix molding.....*444
Press, plastic molding.....*445
Printing press attachment for printing tape in rolls.....*296
Product Engineering, historical summary. 1
Pumps, discharge of gear pumps. C. P. Nachod *28

R

Radio molded by plastics..... *86
Railway coach, Egyptian Zipper.....*270
Range, electric *475
Range, kerosene *474

Reference Book Sheets:

Beams under simultaneous, transverse and axial loading. R. J. Roark.... 519
Comparative serial numbers of standard V-belts 39
Formulas for circular rings. R. J. Roark, *287, pt. 2. *331; pt. 3.....*373
Formulas for combined stress. R. J. Roark *419
Starting torque of split phase motors. Puchstein & Lloyd, pt. 1.....*243
Temperature—resistivity curves of electrical resistors. L. G. Hall, pt. 1, *159; pt. 2.....*199

Refrigeration and Refrigerators:

Modern materials in refrigerators.... *85
Westinghouse refrigerator — finger pressure releases frozen trays.....*427
Relays, overload. C. G. Armstrong.....*267
Research, functions of I.B.M.'s technical research division (chart)..... 307
Rings, formulas for circular. R. J. Roark, (Ref. Bk. Sheets), *287; pt. 2, *331; pt. 3 .....*373
Riveting steel tube joints.....*396
Roaster, electric *474
Robotyper now has welded cabinet..... 253
Rolls, straightening, machine.....*387

Rubber:

Chloroprene rubber *494
Heavy machinery designed with rubber mountings. S. H. Hahn, pt. 1, *59; pt. 2..... *96
Synthetic rubber to be called neoprene 73
Synthetic rubber valve strips.....*126

S

Safety in machinery design. F. A. Mickle 274
Sand cutter with four motors.....*206
Sand muller, centrifugal.....*295
Sander, skilsaw *491
Sawing and filing machine, Continental..*436
Scale has photcelectric cut off.....*469
Scraper controlled by hydraulic unit.....*458
Screen, electro-magnet *206
Separator, magnetic *207
Shafting, chart for proportioning. S. E. Cavalli 189
Shafts for autos and trucks carries sub-housing of rubber.....*390
Shafts, subject to torsion. C. P. Nachod.*313
Shovel, gas powered.....*454
Sine bars for gear checking.....*297

Society for the Promotion of Engineering Education:

Cambridge meeting 235
Solenoid operated valves.....*150
Southern Textile Exposition.....*191
Speed boat—1,000 hp. by V-belts..... 85
Speed, geometric progressions of Rantsch, Decker, Shaw *228
Speed, modifying geometric progressions in. Decker, Shaw.....*106
Splicer for coal-mine tracks.....*340

Springs:

Cylindrical and conical spring design charts. V. Tatarinoff..... 344
Grinding wheel with spring toggle feed *340
No optimum for spring index. Frederick Franz 315
Spring tester *167
Standards for spring design. W. M. Griffith, pt. 1, *89; pt. 2, *140; pt. 3 .....*184
Supplementary information on spring design charts. Victor Tatarinoff...*504

Standardization:

Acoustics standards now available... 72
NEMA publishes three new standards 237
Stapling machine, die cast.....*298

Steel:

Aluminum coated steel now available 411
Metallurgists review modified steel alloys *32
Nitriding machine parts.....*391
Tension to coil sheet steel. K. A. Eck *506
Tubing joints *396
Welding stainless steel. A. E. Taylor.*399
Stoker *473
Stop mechanisms *186
Stop mechanisms, electric automatic.....*222
Stormoguide *208
Straightener *442
Stress and deflection, formulas for torsional. R. J. Roark.....*134

Stresses:

Formulas for combined stress. R. J. Roark (Ref. Bk. Sheets).....*419
Working stresses for compound loaded members. Joseph Marin.....*169
Working stresses for members affected by creep. Joseph Marin.....*209
Surfacing, "Xaloy" hard..... 127
Swaging, designs for rotary. W. L. Bowen, Jr. *272
Swasey, Ambrose, dies.....*280
Switch, cam, for built-in use.....*127
Switch, thermoelectric *468

T

Telegraph printer *94
Telephone set, battery operated.....*470
Telescope of 22 ft. diameter in construction at Westinghouse Electric.....*212
Textile machine, Saco-Lowell.....*448
Thermometer redesigned to harmonize with dairy equipment. E. H. Hammond *100
Thermometer tube, easily read. A. M. Holland *149
Thermometer with three-lens tube..... *6
Thermostat with plastic case.....*470
Tracelarm messenger bag..... *6
Tractor-trailer *461

* Illustrated

Tractors:

Buoyant tires makes tractor a boat.. *8
Redesigning tractor to eliminate projection *7

Trailers:

Sleeper designed like high speed train *86
30 ton capacity trailer equipped with pneumatic tires *87
Trains, streamlined—Santa Fe's Super Chief hauled by diesel-electric.....*271
Trolley bus, Twin Coach.....*466
Truck, diesel *341
Truck, industrial for handling dies..... *47

Tubing:

Collapsible tube that winds on a reel. F. Loewenberg *109
Seamless flexible metal. A. D. Blanchard *48
Steel, construction in automotive field*357
Steel tubing applications advanced by improved welding methods.....*302
Steel tubing joints.....*396
Turbine, steam, built by Westinghouse....*308
Turntable has intermittent motion. A. C. Woodbury *26

V

Valves:

Plastic valve piston.....*390
Solenoid operated valves.....*150
Velocity, angular, problem.....*363, *405
Vending machine for nuts.....*429
Vibrations, eliminated in roll-grinding machinery. Herbert Chase.....*299
Vibration prevented on heavy machinery by rubber mountings. S. H. Hahn, pt. 1, *59; pt. 2..... *96

W

Water heater, oil burning.....*126

Welding:

Cableless spot welding gun.....*207
Designs and preparations for resistance-welded parts. J. M. Cooper..*334
Filler metal specifications now issued. 411
Lincoln Foundation announces prize contest 112
Lincoln prize contest rules..... 152
Preparation of materials for resistance welding. J. M. Cooper.....*360
Shall it be welded? If so-how designed? E. J. Charlton, *258; pt. 2 *310
Spot welding machine has hydraulic control *440
Stainless steel welding. A. E. Taylor*399
Steel tube applications advanced by improved welding *302
Steel tube joints.....*396
Wheels, sprocket, fabricated by welding..*127
Windmill generator speed limited.....*426

Z

Zinc, extrusion of. Herbert Chase.....*214
